

CTUIT'S LABOR COMPLIANCE

Want to ensure that your restaurant stays in compliance with state and federal labor laws? Need a way to see if employees are taking their breaks and what penalties they incurred? Want to ensure your managers have real-time insight to prevent legal infractions?

Meet Labor Compliance.

Ensure that labor compliance policies are properly enforced.

RADAR's Labor Compliance module helps you to easily implement your company's labor compliance policy. Using a configurable set of compliance rules, companies can monitor meal break penalties, split shift premiums, and location-based minimum wage compensation.

This configurable set of labor laws helps monitor and maintain a restaurant's labor compliance policies. Keep your managers informed and provide them the tools that they need to prevent infractions or ensure that they are addressed in compliance with state and federal labor laws.

Use Charts, Reports, Dashboard Widgets and Email Alerts to help keep your labor in compliance and see any Overtime, Doubletime, Compliance related pay and more.

- Apply your own labor law rules as determined by each state that you operate
- View detailed reports explaining the reason for penalties
- Configure your own Minimum Wage management page for local, state, and federal minimum wages by your individual locations
- Minimize overtime and penalty costs using Dashboard widgets, reports, and charts
- Combine labor data for employees working at multiple locations
- Export payroll information including your own defined labor penalties to your payroll software or provider

"Ctuit and OTF allow us to do all of the old functions of logging into our POS and more, while still staying compliant with federal regulations."

-Adam Goldberg, Founder and CEO, Fresh Brothers
