

CTUIT'S PAYROLL INTEGRATION

Want to save time and eliminate errors from manual payroll entry? Want to link to your existing payroll provider without giving yet another new system to your already overwhelmed management team? Want to reduce repetitive administrative functions?

Meet Payroll Integration.

Improve the efficiency of your payroll process with an Compatible Payroll Export.

The Payroll Integration solution automates repetitive administrative functions to minimize the chance of costly human error.

A Ctuit Compatible Payroll Export will reduce repetitive administrative functions through automation and help ensure greater accuracy by minimizing chance of human error.

Define your own payroll penalties by using your Integrated Payroll export in conjunction with our Payroll Processing feature and track Employee Meal Break, Split Shift, Minimum Hours and other regional specific laws using our Special Pay module. Special Pay violations can be added to your payroll export.

- Eliminate time consuming manual payroll data entry
- Track employee meal break, split shift, minimum hours, and other Labor Compliance types across locations
- Export payroll information including your own defined labor penalties to your payroll provider
- Works in conjunction with Payroll Validation to identify potential errors
- Help ensure greater accuracy by minimizing chance of human error
- Reduce repetitive administrative functions through automation

"With Ctuit, we are saving time and money, and increasing productivity."
 -Chris Knap, Marketing & Communications Director, BarFly Ventures
